Imtradex at the PMRExpo 2011

The major industry event for the mobile radio (PMR and Trunked Radio) as well as command and control centers took place from the 22nd to 24th of November this year in Cologne, Germany. Ralf Jäger, Minister for Home Affairs and Local Government of North Rheine-Westphalia, opened the exhibition on the first day. He emphasized the now eleven year track record of PMRExpo. This year new records have been achieved for numbers of exhibitors (190 from 17 states), and occupied floor space (2.783m²). This international industry gathering that brings users and suppliers together is of course a must for Imtradex!

Our Imtradex staff at the booth took the opportunity to establish interesting contacts within the industry and many potential users during could be identified. The stars in our product portfolio are the OnGuard Bluetooth and the Aurelis Bluetooth which debuted on the PMRExpo. Both developments attracted great attention.

As a further development of the innovative lightweight handheld microphone Aurelis, is the Aurelis Bluetooth, the new trendsetter for communication with mobile phones and wireless devices. Also in terms of safety the Aurelis Bluetooth meets the high industry expectations. The OnGuard Bluetooth also attracted the audience with its special ability to be used in undercover investigations with tailored hear/talk solutions, which manifested itself among others in the order numbers. The very discreet headset solutions connected via Bluetooth to your mobile phone and the wireless send button, which is easy to hide in your hand, is the one of the main points for the success of this product.

Following the success of the fair, the Imtradex team look forward to be present at the PMRExpo again next year!

Meet the people behind Imtradex

Left: **Bärbel Schmidt**, International Purchase.

She is working for Imtradex since 2010. Organisation, teamwork and negotiation skills are her strengths. Her motto: Impossible is not an option!

Private interests: skiing, tennis football, riding her bike and walking.

Right: **Farhang Shabani**, Development. He has been working for Imtradex since 2006. Electronic is his passion, especially wireless technology programmed for embedded systems, analogue circuit design and audio engineering. His goal was always to be F.E.C. (**F**ast, **E**fficient and **C**lean in developing new products). Private interests: family, programming embedded systems, device design, movies, literature, swimming and riding his bike.

*Customization: based on 50 Standard products
we provide more than 1700 modifications and variations*

Highlights at the PMRExpo 2011

The Aurelis Bluetooth was one of the many highlight of the PMRExpo.

Certificate of honour to Andreas Maier

Andreas Maier terminated successful his training as an electronics technician for devices and systems on the 31/7-11, with a certificate of honour for the best examination result.

Andreas Maier had always built his own speakers into his car and realized complete Car Hi-Fi projects for friends and family. He also experimented a lot with the music on the sound system in his car. He has started studding international financial management, but missing the practical relevance he decided to study something with acoustics.

The decision was a profession for electronic devices and systems. The education school was the 1st year in the August-Bebel-school in Offenbach and 2nd + 3rd year Friedrich-Ebert-school in Wiesbaden. The basic practical training and preparation was at Pittler ProRegion, and the practical training at Imtradex, with Mathias Glöckner as instructor. We are also pleased that Andreas Maier is continuing working with us in the development.

Product Information (new products):

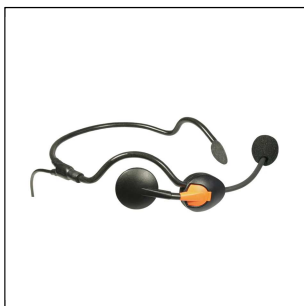

Aurelis-Bluetooth

- Wireless handheld microphone as the solutions for various communication requirements
- Multifunctional
- Rugged splash proofed plastic housing
- Emergency button
- 3-Level volume control
- 3.5 mm bushing for external Audio equipment
- Cloth clip or car holder clip

BusinessLine XSN

- Lightweight monaural neckband headset
- Comfortable, stable and flexible
- Adjustable hanging earphone
- Leatherette ear cushion
- Acoustic-Shock-Protection (ASP)
- Also suitable for VoIP-telephony (Wideband)
- QD-connector (Quick Disconnect)

LogiTalk 4000

- Monaural neckband headset
- NC (Noise cancelling) electrets Microphone
- Light, comfortable, pressure free
- Ergonomic design
- Maximum durability and wearing comfort
- Easy to wear with a helmet without being connected to it
- Temperature range -20°C to +70°C
- Possible to connect to all Pick by Voice-Systems

TM3

- Table microphone with integrated speakers and push-to-talk button to connect to PCs
- Flexible gooseneck microphone
- The broad foot offers a solid stand
- Integrated soundcard
- Possible to link external speaker and external PTT.

We look forward to your questions and enquiries

Yours Sincerely

Your Imtradex-Team
