

## MobilTalk

Part-No.: 0110012-9

application, e.g. in the industry

Noise attenuation capsules with an average noise attenuation value of 27 dB claim the MobilTalk to be a must-have for working environments with high noise levels. This hearing protection headset can be connected to mobile phones and has a noise cancelling microphone for an optimum signal transfer up to 115 dB. Big and comfortable ear cushion and a lightweight headband take care of high wearing comfort.

The MobilTalk holds a standard 2,5 mm phone jack. By using an adapter, it can be connected to various mobile phones. Therefore many different mobile phones from manufacturers like Nokia, Sony Ericsson, etc. can also be operated in noisy environments.

### Technical data:

#### **Microphone:**

Pattern:	electret
Directional:	noise cancelling (NC)
Impedance:	4400 Ohm
Sensitivity:	-44 dB V / Pa, 1 kHz
Frequency:	300 Hz – 9 kHz

#### **Speaker:**

Pattern:	dynamic
Impedance:	200 Ohm at 1 mW / 1 kHz
Sound pressure level:	max. 94 dB
Frequency:	16 Hz – 16 kHz

#### **Additional data:**

Temperature range:	-30°C to +70°C
Weight:	450 g
