

AirTalk XSN

Part-No.: 0110011 xxx

AirTalk XSN with PTT-13 for the field of ATC

The AirTalk XSN is a lightweight monaural neck holder headset. The neckband is pressure free, most durable and flexible. The earpiece is turnable and hinged on the right side. Completed by a replaceable leatherette ear cushion, this neck holder set provides a most convenient alternative to a standard headset. The AirTalk XSN is customized for the requirements of professional use in the field of ATC.

The AirTalk XSN offers Acoustic-Shock-Protection (ASP). This function shields the ear from increased noise levels. A raised edge, located on the top side of the microphone marks its position and allows both, accurate direction and optimum noise compensation.

Technical data:

Microphone:

Pattern:	electret
Directional:	Noise Cancelling (NC)
Impedance:	1100 Ohm
Sensitivity:	-41 dB V / Pa, 1 kHz
Frequency:	100 Hz – 10 kHz

Speaker:

Pattern:	dynamic
Impedance:	600 Ohm at 1 mW / 1 kHz
Sound pressure level:	max. 117 dB
Frequency:	100 Hz – 8 kHz

Send button incl. amplifier (PTT-13):

Housing:	PC/ABS T45, black
Life cycle PTT:	min. 10.000.000 cycles
Protection class:	IP43 ¹
Operating voltage:	+/- 12 V
Power input:	15 mA
Distortion:	0,2 %
Amplification:	approx. 28 dB
MTBF:	approx. 100.000 h

Additional data:

Temperature:	-20°C to 70°C
Weight:	106 g (incl. PTT-Send button)
