

## RS7

Part-No.: 0131018

Induction receiver for covert missions

The RS7 ranks among the smallest induction receivers available. It provides an on/off switch and is predestined for covert use. A big quality feature is the integrated squelch-function. Because of its operating time of 80 hours The RS7 is most suitable for missions that last several days.

An exchangeable serum filter avoids damages due to dirt. The RS7 will be delivered with the induction set OnGuard II. Together, these devices enable sending and receiving messages without being recognized by people around.

### Technical data:

#### **Speaker:**

Pattern:	magnetic
Sound pressure level:	max. 98 dB
Frequency range:	300 Hz – 5 kHz
Distortion:	< 3%

#### **Additional data:**

Operating voltage:	1,4 V
Operating time:	approx. 80 h
Battery type:	A 10 (zinc, air)
Colour:	beige
Temperature range:	-10°C to +40°C
Weight:	1,5 g (incl. battery)

Amplifier:	yes
Squelch:	yes
AGC (Automatic-Gain-Control)	no
